

Create an Ionic Stencil App

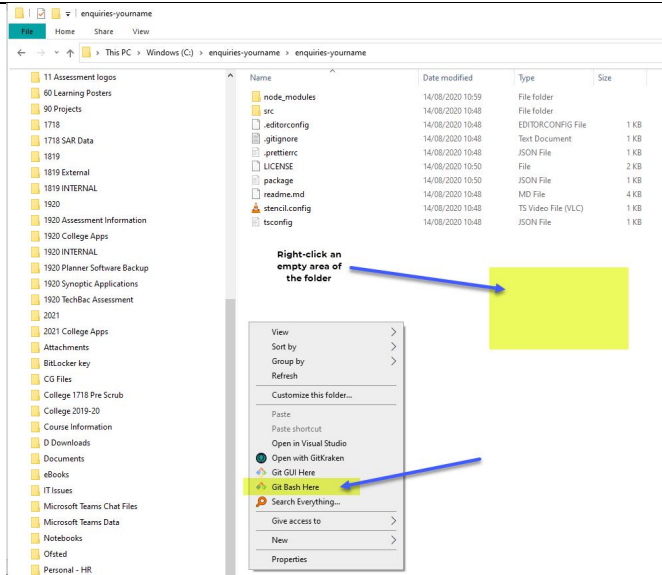

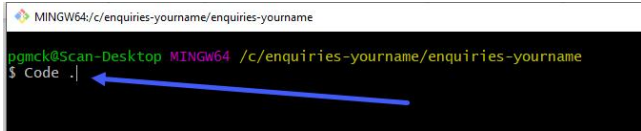

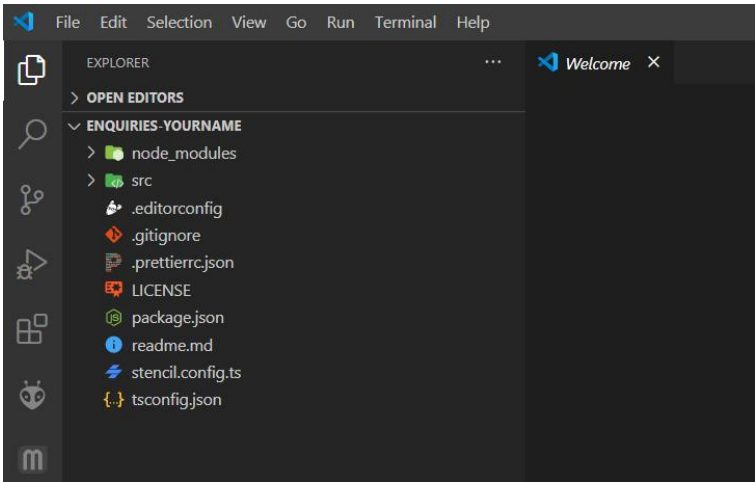

#	Doing	Instructions
1	Open GitBash Terminal	<p>Select the application and Right-Click for options Choose: Run as administrator</p> 
2	Navigate to hard drive	<p>Use the Change Directory command</p> <p>cd c:</p> 
3	Create app parent folder	<p>Once command line focus is in C: drive Make a folder for the application using Make Directory command.</p> <p>mkdir enquiries-yourname</p> 
4	Navigate to parent folder	<p>Put command line focus into newly created director using change directory command cd</p> <p>cd enquiries-yourname</p>

		 <pre> MINGW64:/c pgmck@Scan-Desktop MINGW64 ~ \$ cd C: pgmck@Scan-Desktop MINGW64 /c \$ mkdir enquiries-yourname pgmck@Scan-Desktop MINGW64 /c \$ cd enquiries-yourname </pre>
5	Start Ionic Stencil wizard	<p>Type command line instruction: Npm init stencil</p>  <pre> MINGW64:/c/enquiries-yourname pgmck@Scan-Desktop MINGW64 ~ \$ cd C: pgmck@Scan-Desktop MINGW64 /c \$ mkdir enquiries-yourname pgmck@Scan-Desktop MINGW64 /c \$ cd enquiries-yourname pgmck@Scan-Desktop MINGW64 /c/enquiries-yourname \$ npm init stencil </pre>
6	Choose app type	<p>Select ionic-pwa (default) by pressing Enter (return) key when it is highlighted (Green in my case)</p>  <pre> MINGW64:/c/enquiries-yourname ? Pick a starter - Use arrow-keys. Return to submit. > ionic-pwa Minimal starter for building a Stencil app or website app Collection of web components that can be used anywhere component </pre>
7	Give app a name	<p>My example: enquiries-yourname Press enter key</p>  <pre> MINGW64:/c/enquiries-yourname ? Pick a starter - Use arrow-keys. Return to submit. rëÛ Pick a starter ionic-pwa ? Project name enquiries-yourname </pre>
8	Confirm	<p>Type y and press Enter key</p>  <pre> MINGW64:/c/enquiries-yourname ? Pick a starter - Use arrow-keys. Return to submit. rëÛ Pick a starter ionic-pwa ? Project name enquiries-yourname rëÛ Project name enquiries-yourname ? Confirm? (Y/n)y </pre>
9	Confirmation	<p>Process is completed and Command Line shows:</p>

		 <pre> MINGW64:/c/enquiries-yourname \$ npm start Starts the development server. \$ npm run build Builds your components/app in production mode. \$ npm test Starts the test runner. We suggest that you begin by typing: \$ cd enquiries-yourname \$ npm install \$ npm start Further reading: - https://ionicframework.com/docs Happy coding! pgmck@Scan-Desktop MINGW64 /c/enquiries-yourname \$ </pre>
10	Go to unit GitHub	<p>Git is pgmckillop/20-21-Unit-318 https://github.com/pgmckillop/20-21-Unit-318</p> 
11	Select folder	<p>Click folder Node modules</p> 
12	Select the Zip archive	<p>Click node_modules.zip</p> 
13	Choose Download option	<p>Click Download button</p> 
14	Save to your preferred Download location	<p>Save to your own location. Keep the same name. Make sure you know where it is. Here in a folder on my Desktop called Node_Modules:</p>

		
15	In Windows Explorer	Navigate to your Download location
16	Select the Zip archive by mouse left click	<p>Right-click and choose Extract All</p> 
17	Perform extraction	<p>It should default to same folder but make sure. Do not change the name Complete extraction command by clicking Button Extract. The extraction could take quite a while!</p> 
18	Windows Explorer	<p>Navigate to extracted folder node_modules Right-click and copy</p> <p>Be really careful – Sometimes the Windows extraction tool puts the folder we need inside another folder:</p> 
19	Correct structure	<p>This is the content of the correct folder:</p> <p>Remember, just use this view to check you have the right one. We need to copy the whole folder:</p>

		
20	Windows Explorer	Navigate to folder with stencil app. My example: C:\enquiries-yourname.
21	Windows Explorer	<p>Paste the node_modules folder from the clipboard at top level of the folder. In the folder, Right-Click and select paste. Or, Ctrl+v.</p> 
22	Folder now available	<p>The app folder now includes the required modules</p> 
23		
24	Launch GitBash	<p>To launch GitBash in the correct location. In the app folder, enquires-yourname. Right-click an empty area. Choose GitBash Here.</p>

		
25	<p>In GitBash</p>	<p>Use command Code . To launch Visual Studio Code with this folder</p> 
26	<p>Visual Studio Code</p>	<p>Open with the application folder structure loaded.</p> 
27	<p>Open the Terminal in VS Code</p>	<p>Two ways to do this: Use menu View and select Terminal</p>

		 <p>OR</p> <p>Use shortcut Ctrl+' (Ctrl key + apostrophe key)</p>
28	Terminal window opens	<p>It will open at the bottom of the IDE:</p> <p>Obviously, the command line will be different for your computer's name:</p> 
29	Issue terminal command	<p>Use terminal command: npm start</p> <p>To compile and launch the stencil application in your default browser:</p> 
30	During launch	<p>The terminal displays compilation and launch messages and opens to the Port Number your system chooses. Mine is 3333, yours may be different.</p>

		<pre> pgmck@Scan-Desktop MINGW64 /c/enquiries-yourname/enquiries-yourname \$ npm start > enquiries-yourname@0.0.1 start C:\enquiries-yourname\enquiries-yourname > stencil build --dev --watch --serve [20:48.2] @stencil/core v1.12.2 [20:49.4] build, app, dev mode, started ... [20:49.5] transpile started ... [20:51.1] transpile finished in 1.61 s [20:51.1] copy started ... [20:51.1] generate lazy started ... [20:52.4] copy finished (1235 files) in 1.35 s [20:53.3] generate lazy finished in 2.25 s [20:53.3] build finished, watching for changes... in 3.90 s [20:53.4] http://localhost:3333/ </pre>
31	In your default browser	<p>The Stencil template application launches using the selected port address:</p> 
32	For mobile layout and developer tools	Press the F12 key
